Investment strategy

A responsible selection of mid-caps

Sycomore Sélection Midcap seeks to outperform the MSCI EMU Smid Cap Net Return index (dividends reinvested) by employing a socially responsible and multi-themed investment process (energy transition, healthcare, nutrition, well-being, digital...) in keeping with the United Nations' Sustainable Development Goals (SDGs). Primarily exposed to EU country equities, the fund specifically targets the mid-cap segment, with no sector constraints. Our ESG exclusion and selection methodology is fully integrated into our corporate fundamental analysis framework.

Fund commentary

Confirmation of a September rate cut by Jerome Powell and Nvidia's decent earnings publication helped to defuse the unrest early in the month, when fears of a recession in the US caused some market jitters. Small and mid-caps did not stand out in relative terms, but the expected rate cuts and rather resilient economies could make a difference before the end of the year. This month's top contributor was Esker, which following its robust earnings publication confirmed it had entered talks with Bridgepoint over a possible bid. Considering the uncertain outcome of this deal, we preferred to trim our position. In contrast, Puma and Cancom sold-off on disappointing earnings publications. The latter reports that demand for IT equipment from public sector clients and small companies in Germany remains weak.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

Dialogue and engagement

Dermapharm

As part of an individual engagement initiative, we issued some recommendations for the group to improve its governance. We suggested they raise the number of board members (currently 3 members), improve gender diversity within the board (no women today), improve transparency on its compensation policy, and incorporate ESG KPIs into the executive remuneration plan.
