Investment strategy

A responsible and opportunistic selection of Investment Grade bonds based on a proprietary ESG analysis

Sycomore Environmental Euro IG Corporate Bonds aims to outperform the Bloomberg Euro Aggregate Corporate Ex-Financials TR index over a recommended minimum investment period of 3 years by investing in bonds issued by companies whose business model, products, services or production processes make a positive contribution to the challenges of energy and ecological transition through a thematic SRI strategy.

Fund commentary

The prospect of a trade agreement between the United States and several of its partners, such as Europe and Japan, allowed for a positive market environment in July. In the absence of decisions from central banks, markets are hanging on for the Fed to lower its rates and for the ECB to make its final 25-bp cut. Yield curves continued to steepen amid lower demand for sovereign bonds. In contrast, corporate bonds remain very popular with investors and credit spreads have contracted further. This affected both categories, Investment Grade as well as High Yield. Capital flows from investors were also elevated, clearly supporting corporate bond valuations. The first corporate earnings publications demonstrated the resilience of auto equipment manufacturers, including Forvia and OP Mobility, as well as continued profitability growth within the financial sector. The real estate sector (Vonovia, Altarea) is also recovering gradually.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.
