Investment strategy

A responsible and opportunistic selection of Investment Grade bonds based on a proprietary ESG analysis

Sycomore Environmental Euro IG Corporate Bonds aims to outperform the Barclays Capital Euro Corporate ex-Financials Bond TR index over a recommended minimum investment period of 3 years by investing in bonds issued by companies whose business model, products, services or production processes make a positive contribution to the challenges of energy and ecological transition through a thematic SRI strategy.

Fund commentary

US 10-year bond yields have been retreating since mid-January. Fears of inflationary pressure caused by Trump's political agenda - confirmed by the poor inflation figures in the US - are gradually turning into concerns over economic growth, as suggested by declining consumer confidence and the rise of the Euro. Long-term rates fell by around 10 bp in Europe. France's risk premium also dipped slightly. Spreads narrowed across the full credit spectrum: the BBB and BB-rated segments contracted around 10 and 15 bp respectively. Our investee companies reported decent annual earnings overall. Prysmian's earnings met expectations, and management is upbeat and confident for 2025. Some bonds offered an attractive issuance premium. Loxam, Europe's leading equipment rental company, refinanced some of its secured notes due in 2026 with a new 5-year bond bearing a coupon of 4.25%.

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.
