Investment strategy

A responsible and opportunistic selection of Investment Grade bonds based on a proprietary ESG analysis

Sycomore Environmental Euro IG Corporate Bonds aims to outperform the Bloomberg Euro Aggregate Corporate Ex-Financials TR index over a recommended minimum investment period of 3 years by investing in bonds issued by companies whose business model, products, services or production processes make a positive contribution to the challenges of energy and ecological transition through a thematic SRI strategy.

Fund commentary

Disrupted by the erratic announcements over the conflict in the Middle East, bond markets experienced a volatile month in April. Credit closed the month higher, nonetheless. The 5-year risk premiums on French and Italian debt relative to Germany have narrowed a little. Credit spreads have eased. The High-Yield segment retraced much of the losses recorded in March. The primary market recovered during the month across all market segments. To fund the acquisition of power grids in the United Kingdom, Engie issued two-tranche hybrid bonds rated BBB- for a total of €1.6 billion. We subscribed to the shortest maturity issuance: a bond with a first call date in 2031 and offering a coupon of 4.37%. Similarly, Elia, the operator of Belgium's transmission system, issued a €500 million hybrid bond to finance its ambitious investment programme. The issuance pays a coupon of 4.75%, is rated BB+ and is callable in 5 years (first call).
