### Investment strategy

Sycoyield 2030 is a maturity fund seeking yield opportunities on the bond markets. It invests mainly in high-yield corporate bonds issued in euros, maturing mainly in 2030 and intended to be held until maturity. The selection of issuers takes into account environmental, social and governance issues.

### Fund commentary

US 10-year bond yields have been retreating since mid-January. Fears of inflationary pressure caused by Trump's political agenda, confirmed by the poor inflation figures in the US, are gradually turning into concerns over economic growth, as suggested by declining consumer confidence and the rise of the Euro. Long-term rates fell by around 10 bp in Europe. France's risk premium also dipped slightly. Spreads narrowed across the full credit spectrum: the BBB and BB-rated segments contracted around 10 and 15 bp respectively. Some bonds offered an attractive issuance premium. Loxam, Europe's leading equipment rental company, refinanced some of its secured notes due in 2026 with a new 5-year bond bearing a coupon of 4.25%. We also subscribed to the Tier 2 issuance by CCF Holdings, created following the merger of the former CCF and MyMoneyBank, both owned by the Cerberus fund. This BB+-rated bond, maturing in 10 years and callable in 5, bears a coupon of 5.15%.
