Investment strategy

A responsible and opportunistic selection of €-denominated Investment Grade bonds based on a proprietary ESG analysis.
Sycomore Euro IG Short Duration invests in €-denominated Investment Grade bonds with maturities of 0 to 5 years (with a minimum of 50% of net assets invested in maturities of 0 to 3 years), over a minimum investment horizon of two (2) years. No more than 10% of the net assets may be invested in high-yield securities. Similarly, investments in unrated securities will not represent more than 10% of the net assets.
The investment strategy consists of a rigorous selection of bonds and other debt securities denominated in euros, issued by private or public-sector issuers and similar entities, to which the Fund will be exposed at all times between 60% and 100% of the net assets, including a maximum of 20% of the net assets for public-sector issuers and similar entities, with no sector or geographical allocation restrictions (with the exception of exposure to non-OECD countries, including emerging countries, limited to a maximum of 10% of the net assets).

Fund commentary

The most recent price indicators have highlighted persistent inflation in the Eurozone, notably on account of energy costs. Nonetheless, the ECB has rather tempered interest rate expectations. Investors are now anticipating only one hike before the end of the year. This has brought yields on two-year German bonds from 3.30% to 3.10% and somewhat re-steepened the yield curve. Long-term sovereign yields have entered a downward trajectory, with the notable exception of France, where public finances are a growing concern for investors. The 10-year spread versus Germany has now topped 150 bp. In this more volatile context, credit spreads have widened: +20 bp for BBB issuers and +40 bp for BB-rated issuers - bringing yields in this segment close to 5.7%. B-rated bonds, a segment where spreads have widened by almost 100 bp, underperformed by a large margin.

Environmental analysis

Net Environmental Contribution (NEC)

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the (nec-initiative.org) based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 83% / index 82%

Carbon intensity of sales

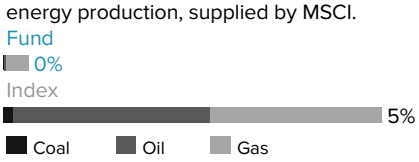

Weighted average of annual greenhouse gas emissions (GHG Protocol) from scopes 1, 2, 3 upstream and downstream as modelled by MSCI per annual sales in k€.

Coverage rate : fund 86% / index 95%

	Fund	Index
kg. eq. CO_2 /k€	513	1133

Fossil fuel exposure

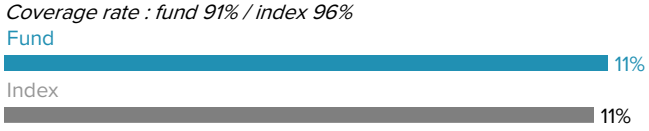

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by MSCI.

European taxonomy

Share of EU taxonomy-aligned company revenues provided by MSCI.

Coverage rate : fund 91% / index 96%
