Investment strategy

A responsible and opportunistic selection of €-denominated Investment Grade bonds based on a proprietary ESG analysis.

Sycamore Euro IG Short Duration invests in €-denominated Investment Grade bonds with maturities of 0 to 5 years (with a minimum of 50% of net assets invested in maturities of 0 to 3 years), over a minimum investment horizon of two (2) years. No more than 10% of the net assets may be invested in high-yield securities. Similarly, investments in unrated securities will not represent more than 10% of the net assets.

The investment strategy consists of a rigorous selection of bonds and other debt securities denominated in euros, issued by private or public-sector issuers and similar entities, to which the Fund will be exposed at all times between 60% and 100% of the net assets, including a maximum of 20% of the net assets for public-sector issuers and similar entities, with no sector or geographical allocation restrictions (with the exception of exposure to non-OECD countries, including emerging countries, limited to a maximum of 10% of the net assets).

Fund commentary

The Fed lowered its key rates by 25 bp, as widely anticipated, and the market is expecting two further cuts before the end of the year. In contrast, the ECB has left its rates unchanged and is rather more optimistic on growth within the Eurozone; however, the central bank has not issued any signals regarding its monetary policy over the next few months. Spreads have narrowed across the credit spectrum, causing the High-Yield segment to outperform better-rated issuers. In particular, the downgrade of France and the upgrade of Spanish and Italian credit ratings had little impact on corporate debt risk premiums. The primary market stayed very dynamic in September. Swiss operator Matterhorn, owned by Xavier Niel, issued a 5-year bond to finance the purchase of majority stakes in Monaco Telecom: the yield came in close to 4%, with a BB rating. Gestamp, the Spanish automotive supply manufacturer, specialised in bodywork, was able to refinance its short-term debt with a BB rated 5-year bond yielding 4.40%. The Swiss ingredients company Givaudan issued a 4-year bond bearing a coupon of 2.875, with a Baa1/A- rating.

Environmental analysis

Net Environmental Contribution (NEC)

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 87% / index 81%

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.
