### Investment strategy

Sycoyield 2032 is a fixed-term fund seeking yield opportunities in the bond markets. It invests primarily in a rigorous selection of bonds (including convertible and subordinated bonds known as hybrids<sup>1</sup>) issued in euros, with maturities mainly in 2032, which are intended to be held until maturity. The carry strategy aims to achieve an annualised performance net of fees, in line with the markets for bonds issued mainly by private issuers, of any rating, with an average maturity of 2032 over an investment horizon of 7 years and 6 months. This objective is based on Sycomore AM's market assumptions<sup>2</sup> and does not constitute a promise of return or performance for the fund, which presents a risk of capital loss.

### Performance as of 31.03.2026

According to the current legislation, we cannot disclose the performance of a fund that has a reference period of less than 12 months. For further information, please contact our team.

### Fund commentary

The outbreak of the war in Iran on February 28th caused a broad correction across risk assets, including sovereign bonds, which retreated sharply. The 5-year risk premia on French and Italian debt versus Germany widened by 13 and 27 bp respectively. Spreads on BBB corporate bonds rose by around 15 bp. High-Yield bonds saw their spreads widen by 50 bp. B-rated bonds underperformed their BB counterparts. The latter now display a yield-to-worst around 5%. Central banks were unable to supply more details on their short-term decisions. The ECB's speech was perceived as rather hawkish, preventing long-term yields from easing. The market is expecting around three interest rate hikes in 2026 for the Eurozone - a rational forecast considering that 10-year inflation expectations are once more topping 2%. Although volatility is hindering appetite for risk, the investment firm HLD - which is rated BBB+ - issued a new bond maturing in 2032 and bearing a coupon of 4.25%, an attractive yield in our view.

<sup>1</sup>Up to a limit of 30% of net assets for hybrids and other debt or money market instruments issued by private or public issuers and similar entities, to which the net assets will be permanently exposed between 60% and 100%, of which a maximum of 30% may be for public and similar issuers, and with a maturity of no more than one year after 31 December 2032. <sup>2</sup>These assumptions include the risk of default or downgrade of one or more issuers in the portfolio. If these assumptions materialise to a greater extent than expected, the management objective may not be achieved and the investor may suffer a capital loss. Opinions, estimates or forecasts regarding bond market trends or changes in the risk profile of issuers are based on current market conditions and are subject to change without notice. Sycomore AM makes no commitment as to their achievement. Sustainable investments may have negative impacts on certain ESG factors. Further information on our [policy regarding material adverse impacts](#).
