## Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

## Fund commentary

The extension of the conflict in the Middle East, including Israeli strikes on Iranian nuclear installations, caused oil prices and volatility to rise and sparked a correction across European equity markets. The continued weakness of the dollar reflects rising caution as investors express concerns over a potential loss of independence for the Fed. In this rather unfavourable environment, the portfolio held up well on account of its diversification into AI-related US technology (Micron, Nvidia, Stryker). Conversely, Renault suffered after its iconic CEO, Luca de Meo, stepped down. Similarly, Deutsche Bank fell after Softbank sold its stakes in the former's American subsidiary, T-Mobile. Owing to high geopolitical tensions combined with resilient equity markets, we are maintaining our equity allocation at around 45%. Within the portfolio, we sold Micron Technology at the end of the month after the stock's exceptional market run.
