Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

In March, the escalation of the Iranian conflict and the ensuing energy shock revived investors' aversion to risk. Interest rates have been volatile, rattled by fears of inflation and the caution expressed by central banks. The hype around artificial intelligence continued to support several segments, amid rising stock dispersion. The fund posted a loss in this market environment. Stock picking with industrials exposed to the AI infrastructure build-out (Easton, Prysmian), as well as CATL, the Asian energy storage specialist, contributed positively to performance. In contrast, stock selection within technology (Infineon, MongoDB), commodities (Antofagasta, Boliden) and real estate (Vonovia) detracted. The fund's equity exposure was managed in a disciplined manner, we lowered our equity allocation from 56% to around 45% via the purchase of hedging strategies to protect higher-risk areas (European and Asian equities). Within the portfolio, we strengthened positions offering greater visibility across the telecommunications, utilities and defence sectors (Deutsche Telekom, EDP, Thales). Meanwhile, we lowered our exposure to consumer spending (EssilorLuxottica, LVMH), sold Telecom Italia after Poste Italiane's takeover, and trimmed Vonovia.
