Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

European equity markets continued to rally in February and enjoyed a record start to the year, outperforming their US counterparts by a wide margin. Despite global trade tensions, investors welcomed the robust earnings reported by European companies, the outcome of the German elections, and the potential for a ceasefire in Ukraine. Financial or overlooked sectors (telecoms and agri-food) benefited from this move, which proved favourable to our equity portfolio on account of its exposure to Italian and Spanish banks and to E.On. Conversely, Prysmian and Assa Abloy suffered after missing earnings expectations. The portfolio's equity exposure paid off and was dialled down to 54% at the end of the month. After this market rally, we sold several of our investment convictions, either because they lagged on the operational front (Novo Nordisk, Microsoft, United Rentals and Roche) or because of their weaker upside potential (De Longhi). The proceeds were used to reposition the portfolio on healthcare innovation in the United States, via Eli Lilly and Intuitive Surgical, on cybersecurity via Cyberark Software and on European industrial players (Siemens and Kemira).
