Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

The economic headlines were rather mixed in September, with a timid recovery in the Eurozone driven by Germany and a labour market slowdown in the US. The much-awaited rate cut by the Fed fuelled the stock market rally, with several members suggesting that other cuts could follow if the data allows. In contrast, long-term rates in the UK reached their highest level in 27 years, bonds faltered, and gold hit new records amid great uncertainty. The portfolio benefited from its exposure to technology (ASML) and to industrials (Prysmian and Bureau Veritas). The relative strength of the US economy, growing investment in AI, the pro-cyclical effects of deregulation, and the Fed's rate cuts will support growth and have encouraged us to raise our equity allocation to 48%. We therefore purchased exporting companies benefiting from the tariff agreements (AstraZeneca, Novartis, Hermès) as well as selected technology players (Microsoft, ASML). We also took advantage of Wendel's disposal of Bureau Veritas shares to strengthen our position.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.
