## Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

## Fund commentary

Markets rose in January, lifted by hopes of rate cuts. Equity markets continued their upward trend, supported by the artificial intelligence boom and accelerating economic growth. Interest rates remained volatile, caught between geopolitical concerns over Greenland and Iran and the cautious rhetoric from central banks. The fund's performance was primarily driven by our allocation choices, with a bias towards technology and industrials, while the contribution from stock picking proved rather more mixed. The strong performances posted by ASML, Baidu and Babcock offset some weaker returns within the portfolio, notably Danone, Nvidia and Bureau Veritas. The fund's equity exposure was raised, as our positive investment thesis on equity markets was confirmed in January. In terms of portfolio activity, we strengthened the defence theme with Qinetiq and took part in CSG's IPO. We increased our Asian footprint with CATL and Eugene Technology and consolidated our exposure to commodities via Antofagasta. By contrast, we trimmed our US weighting by selling holdings in JPMorgan, Nvidia, NextEra Energy and Microsoft.
