Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

Supported by a "Goldilocks" scenario in the United States, the equity market rebound that began at the end of October continued into January. Technology (ASML and SAP), media, and healthcare stocks drove index performances, while mining companies and utilities somewhat detracted. Our two positions in RWE and EDP weighed on the fund's performance. Since the middle of December, we have strengthened the fund's defensive positioning, considering: i) the traditional effects of a slowdown in nominal GDP growth in the US and Europe in 2024 on earnings per share, ii) margin levels in Europe and the US are close to their peak and expected to improve, although real wages are increasing, and the effects of monetary tightening will soon be felt. Within defensive sectors, we trimmed our exposure to Utilities to strengthen Telecoms (Orange and Proximus).

ESG follow-up, news and dialogue

Dialogue and engagement

STMicroelectronics

We asked STMicroelectronics to provide more transparent information on weightings, trigger points, targets and achievements on its criteria relating to short and long-term executive remuneration. We notably encouraged the company to assemble information on the annual ESG criteria achievement ratios within the proxy.

Teradata

During a discussion with Teradata, a service provider and data management platform, we made 3 recommendations to the company: to incorporate ESG remuneration criteria to executive incentive plans, to publish the pay equity and gender wage gap, and to change its statutory auditor (PwC has been Teradata's audit company since 2007).
