Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

In May, after the 90-day suspension on additional tariffs was announced, most European equity markets recovered the losses that had followed "Liberation Day". Our investments performed well thanks to the rebound posted by the industrial sector (Prysmian, Bureau Veritas). In this more constructive environment, we reviewed our investments to position our portfolio for a new market phase with fewer fears over the trade war - though admittedly involving negotiations - but now amid an economic slowdown. We took advantage of the rebound to continue our profit taking. Our equity exposure was lowered from 54% to 45% and changes were made to adapt our portfolio to this more constructive period for global trade, in which companies that had been identified as the main losers of the trade war can gain from the implementation of reasonable measures. We trimmed some our positions in healthcare, a sector facing heightened regulatory risk, to reinvest in players offering potential upside if negotiations are constructive, such as Autoliv (auto) and Micron (tech).
