Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

In April, equity markets traded in an environment still marked by tensions in the Middle East, energy volatility, and interest rate uncertainty, while earnings season and AI-related momentum continued to support growth and infrastructure sectors. Against this backdrop, the fund had a very strong month, driven by both asset allocation and stock selection. The contribution came primarily from our exposure to technology and industrials. Asset allocation was managed with discipline, gradually increasing exposure as ceasefire talks progressed, before ending the month at around 50% following profit-taking. In terms of portfolio adjustments, we strengthened positions in sectors likely to benefit from higher energy prices, such as utilities and commodities, while reducing holdings in consumer goods and software. Finally, we executed trades based on new convictions, buying Telia over Deutsche Telekom and Thales over Babcock.
